

PRESS RELEASE

Chaparral Introduces the 2018 21 H2O SURF

FOR IMMEDIATE RELEASE

December 19, 2017

With the addition of the 21 H2O Surf to Chaparral's Surf lineup, achieving a world-class wake has never been easier. This new model blends the signature style and versatility of Chaparral's H2O series with details that make the Surf series a thrill-seeker's favorite. At 21 feet, it is the ideal size for many boaters, and power comes from an innovative Volvo Penta Forward Drive. The system's variable trim provides for increased flexibility and helps shape the surf wave. Turns are smooth, quick, and tight, perfect for wake surfing and other water sports.

On board, a Medallion touch-screen display provides straightforward controls the whole family can use. From this convenient system, passengers can also switch the Malibu Surf Gate™ from side to side with ease. Competition-level wakes can be achieved with unprecedented ease, with no need to manually change the ballast weight on board.

"The Chaparral Surf series has been a resounding success," adds Bill Pegg, Chaparral Senior VP. "We're excited to make this cutting-edge wake surf technology available on our most affordable Surf model yet." The 21 H2O Surf joins an esteemed lineup of boats that celebrate the spirit of on-the-water enjoyment. The Surf series blends modern innovation with Chaparral charm and quality throughout.
